

Explore the New Era of Speed

BOLT XR

DDR4 Gaming/OC Memory

KLEVV's BOLT series is now returned with a refreshing look & improved performance! The new KLEVV BOLT XR DDR4 Gaming/OC Memory upholds the concise & low-key design style of BOLT family. By applying simple liner embossed patterns on the refined aluminum heatsink surface, the new BOLT XR embodies the perfect interpretation of "Minimalism".

With years of in-depth R&D experience in semiconductor industry, KLEVV makes every effort to bring the new BOLT XR to the next level. Composed of thoroughly-screened memory chip/components with rigorous testing process & platform-level verification, KLEVV BOLT XR brings enhanced operating speed with unquestionable reliability/compatibility. Looking for an ideal memory for system setup & upgrade? KLEVV BOLT XR is your best choice to explore the New Era of Speed!

XMP 2.0
One-step OC

Aluminum
Heat Spreader

Performance
Upgraded

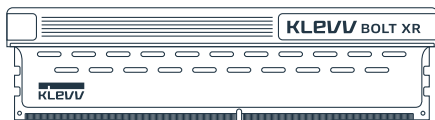

QVL
Verified

Support Intel/
AMD Platforms

Features

- XMP 2.0 one-step overclocking
- Highest quality and reliability through accurate test procedures
- Reduced voltage and ultra-lower power consumption
- QVL approved and compatible with all major motherboards/platforms
