System Support

- Windows 8/ 8.1/ 10
- Mac OS X 10.6 or higher (Reformatting required)
- Android 5.0 or higher
- Linux Kernel 2.6 or higher

Getting Started

Please follow simple steps below to get your device ready.

1. There is no need to connect an external power supply for R1, only need to use the cable inside the box to connect the host device.
2. Check the USB port of host device and select the corresponding USB cable (Type-C or A) to connect.

Type-C to C cable

Type-C to A cable

3. Ensure that the cable is tightly connected.
4. Check if the power/ activity light is flashing.

5. After the light is on, you can start to use R1.

Data Recovery Software

Registering product through our website, you can freely use the data recovery software, DoYourData, if there is any deleted, formatted or lost file.
